Sunday, October 3  
9:30 am-5 pm

Join us for a daylong celebration of the slimy and scaly. Get to know reptiles and amphibians from around the world and right here at home. The whole family will enjoy up-close animal encounters, live music, art projects, and hands-on activities.

Also, don't miss an afternoon lecture by charismatic author and founder of the Chelonian Research Institute, Dr. Peter Pritchard. He'll take us on an entertaining and enlightening journey, discussing his research, education efforts, and ultimate goal to save the world's turtles.
